

## My thoughts on home learning in lockdown 2021

I didn't like that we were going back into lockdown because I would miss my friends and it wouldn't be easy working from home. Home learning was difficult because there were a lot of distractions and I wouldn't have anyone to help me. I didn't like not seeing my friends because I was getting bored around the house. The first time I used google classroom I didn't know how to go on my work and hand it in but once I started using it more, I was able to use it and hand in all my work.
